# Welcome Message

Dear Participants,

As the CEO of the African Innovation and Entrepreneurship Centre and the chairperson of the AIEC 7th edition of the African Entrepreneurs Conference committee, I am honored to greet and welcome all of you to the AIEC 7th edition of the African Entrepreneurs Conference 2020. We are hosting our conference online this year, and we hope our conference will be held with great success.

The program committee did its utmost to prepare a serious and rich program an important defining characteristic of our conference promotes entrepreneurship as a platform to transform the economic narrative of the African continent through wealth and job creation. The conference offers an influential network of African entrepreneurs from which all entrepreneurs can leverage. This event will facilitate robust dialog and opportunities for business marketing and growth through direct contact between investors and entrepreneurs on the continent and diaspora to foster collaboration. This will create a conducive environment for exchanging ideas and knowledge and is planned to attract USD$15 billion investment for African entrepreneurs.

All of this provides a unique platform for communicating and cooperation with entrepreneurs from various industries in Africa.

We are confident that over the two days you will get theoretical grounding, practical knowledge, and personal contacts that will help you build a long term, profitable and sustainable business in Africa. I would like to thank our team and all our partners who was responsible for preparation of the conference, and who devoted a lot of their time to make this conference a success. And finally, would like to thank all of you dear participants and speakers for bringing your ideas, knowledge, and expertise to this interesting sphere with the noble goal of making Africa better for the future generations. I wish all of you valuable new contacts, fruitful work, and promising joint initiatives. Hope you enjoy the conference.!

Sincerely Yours,

**Oliver F Chikodzore**

***CEO of The African Innovation and Entrepreneurship Centre***

## **Oliver Fortune Chikodzore,** South Africa

***CEO, The African Innovation and Entrepreneurship Centre***

***Author, Speaker and Entrepreneur, Specialising in Thought- Leadership***

## Biography

Oliver Chikodzore is an entrepreneur, who specialises in thought-leadership and strengths-based personal development. He is an abstract thinker, yet also a concrete theorist of note. This is evident in his articles and his works in various thought-leader platforms, in which he has held presentations and lectures through Project Management South Africa (PMSA) and Cape Media Corporation, just to name two. Currently, he is the Chief Executive Officer of The African Innovation and Entrepreneurship Centre: an initiative that helps uplift the youth in struggling communities and mobilize the future of African development and economic growth. A fervid entrepreneur at heart, Oliver speaks professionally on leadership, innovation change and creating a high-performance culture. Oliver believes the blueprint to building a successful business lies in getting four key pillars right: the quality of its leadership; its ability to innovate strategically and creatively; its proficiency at managing change intelligently; and lastly, the degree to which it can embed a high-performance culture in people, especially in identifying critical aspects in high-pressure situations. He is extremely passionate about instilling leaders with the necessary skills to build empires and achieve greatness within a highly competitive market.

## Introduction of the Case Study

On Behalf of The African Innovation and Entrepreneurship Centre, Oliver Chikodzore will explain the trends that shaped the conference theme and AIEC's in the development of entrepreneurship on the African Continent.

## **Dr. Rufaro Mucheka,** South Africa

She is a member of the Golden Key International Honour Society, a Certified Financial Planner professional (CFP®) and holds an MBA and PhD from the UCT Graduate School of Business. Above all, she is a mother, a sister and mentor to many aspiring leaders.

## The Value of Social Capital to Entrepreneurs

## Abstract

As an entrepreneur, you become a jack of all trades. Who you know and where you get pertinent information to grow your business count. You rely on ideas and information from other people to set up and grow your business. In business, as in life, relationships matter. It is not just about knowing who-you-know, but knowing who-knows-who-you-know and what you extract value from these symbiotic relationships to make decisions. It's not just about what you want and when you need it but it's a culmination of people, trust and reciprocity that moves the dial.

- Do you know who is in your network?
- What are you doing to nurture your social capital?
- What strategies do you use to increase your social capital?

## **Mr. Barada Panigrahy,** India

***Director, Incubation Centre***

### Biography

Mr. Barada Panigrahy has around 20 years of experience in Entrepreneurship Development, currently heading the Incubation Centre at Sri University in India. ## **Tersia Stellenburg,** Botswana

***CEO, Dikgato Tsame (Proprietary) Limited, Botswana Head of Strategy***

### Biography

Tersia is the founder and CEO of Dikgato Tsame (Botswana)(Pty)Ltd. Tersia is an accredited executive coach with Level 9 accreditation in Executive Coaching from University College Cork, Ireland. She has also been trained in the RocheMartin leadership development tool, the Emotional Capital Report (ECR) and the Emotional Capital Leadership development system; is therefore qualified to deliver individual ECR/ ECR360 feedbacks

and to facilitate RocheMartin's Emotional Capital Leadership Program. She was recently the guest speaker for the National Strategy Office, of the Office of the President of Botswana, was one of the recipients of the SADC Women Forum & Leadership Excellence Awards and inducted into the SADC Women Leaders Hall of Fame.

Tersia worked for fifteen years in various positions in leading Botswana companies, notably PricewaterhouseCoopers, Time Projects (Proprietary) Limited, Botswana Breweries (Proprietary) Limited and gained experience in administering and managing various aspects of businesses. The exposure gave her confidence in working towards her dream of establishing her own business and she founded Kagiso Funeral Parlour in Maun, Botswana. Under her leadership over eight years this business grew. It became the market leader in funeral industry in North and Central Botswana, a household name and the service-provider of choice. This business later merged with FSG Limited and was listed on Botswana Stock Exchange in 2008.

## Dr. Jonathan Abrokwah

***Advisory Board Vice Chairman of i2iMegaHub***

### Biography

Dr. Jonathan Abrokwah is the Advisory Board Vice Chairman of i2iMegaHub, an NGO supporting African especially the youth harness their ideas to make global impacts. He is a consultant in semiconductor Photonics and integrated circuits. He has about 40-year industrial experiences with 45 patents and over 75 scientific publications on electronic materials, devices, and components.

Dr. Abrokwah is one of the pioneers in the field of semiconductor Photonics. Dr. Abrokwah was involved in high frequency high electron mobility transistor and heterojunction bipolar power amplifier development.

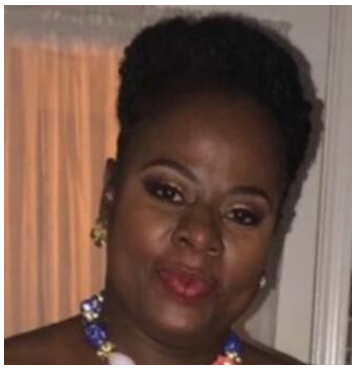

He is a Life Member of Institute of Electrical, and Electronics Engineering (IEEE) and Compound Semiconductor Manufacturing Technology (CSMantech)

Dr. Jonathan Abrokwah obtained both his bachelor's (1974) and Master's degrees (1976) in Electrical Engineering from the Massachusetts Institute of Technology (MIT). He both a PhD degree in Electrical Engineering and Master's in Materials Science Engineering from the University of Southern California under a Rockwell International Fellowship in 1979.

Companies Dr. Abrokwah worked for includes the Bell Laboratories in New Jersey, Honeywell Corporate Research Laboratory in Minnesota, McDonnell Douglas Electronics Systems Company in California, Motorola in Arizona, and Avago Technologies in Colorado.

## Mrs. Afua Boateng

***Director of Strategic Partnerships and Alliances, i2iMegaHub***

### Biography

Afua Boateng is the Director of Strategic Partnerships and Alliances of i2iMegaHub, an NGO supporting African especially the youth harness their ideas to make global impacts. She is an MBA professional with background in Finance and Information Technology (IT) with over six (6) years' experience in Banking, Insurance, Technology and Service domains. Experienced in SAP Business Intelligence, Business Warehouse, Business Objects. Strong work ethic, highly analytical, team and results oriented, excellent communication skills, customer-focused, ability to multi-task, detailed and growth oriented, openness to new ideas, adaptable, lean mentality, fast learner, and globally focused leader.

Afua is unbelievably detailed oriented and is proactive in asking probing questions to get clarity and better understanding needed for any projects. My recent work has been focused on Data Conversions. I have had a productive recent year primarily assisting with the Data Conversion of Accenture Interactive's – Creative Agency Model Project - 3 Newly Acquired Creative Agencies in

UK, Ireland and Australia needed to be converted into a newly acquired platform.

Afua is also a philanthropist with passion in helping the next generation gain exposure to critical and relevant skills that will enable them to make better career choices. Considering this, she formed an NGO called Digital Youth in Ghana and USA with the mission to create the awareness and importance of computer science education to underrepresented youth.

## Dr. Jonathan Abrokwah and Mrs. Afua Boateng

## Digitalization, Connectivity, Information Flow and Africa's Development

## Abstract

Digitalization is a process of adopting or integrating various modern digital technologies to business processes to enhance productivity, and efficiencies with the ultimate strategic goal of increasing revenue. Most western businesses and governments have actively pursued digitalization and digital transformation. African economies have also begun to examine and can greatly benefit from digitalization and transformation.

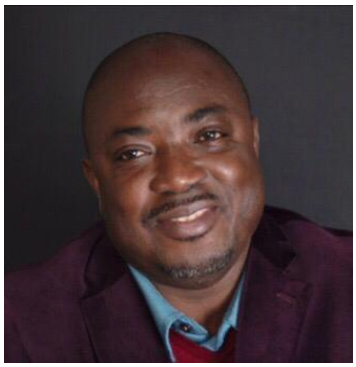

A digital transformation is enabled by technologies – computers, data servers, internet, smartphones, and cloud storage and computing, which allow digitized data and information flow through wired or mobile connectivity for easy accessibility.

This presentation examines areas such as manufacturing, human resource, agriculture, general commerce, and healthcare, where implementation of digitalization will be key for African development. We will also discuss collaboration technology, cyber security, cloud technology, mobile technology, innovation and education.

The working-age population in Africa is expected to increase by some 450 million people between 2015 and 2035, according to a joint report by World Bank Group, the World Economic Forum and African Development Bank. And, if current trends continue, less than one quarter will find stable jobs and over 300 million people will be unemployed. The key for Africa is education in technology, innovation and position itself for digital transformation across all sectors.

## Dr. Alexander Anim-Mensah

***President of i2iMegaHub***

## Biography

Dr. Alexander Anim-Mensah is the President of i2iMegaHub, an NGO supporting African especially the youth harness their ideas to make global impacts. He has over eighteen (18) years' experiences in Engineering, Business and Management and has a PhD, MS & BS in Chemical Engineering from the University of Cincinnati - Ohio, North Carolina A & T State University -NC and the Kwame Nkrumah University of Science and Technology (KNUST) - Ghana, respectively.

Other specializations includes Technology, Operation and Value Chain Management from the Massachusetts Institute of Technology (MIT) Sloan School of Management - MA, Business Strategy from the University of Virginia Darden School of Business - VA, and Intellectual Property Law & Policy from the University of Pennsylvania - Pa.

Dr. Alexander Anim-Mensah being an Innovation enthusiast is involved in over 30 inventions and US & world patents in areas including energy recovery, sensing, chemical & water improved efficiencies, refrigeration & heat pump, optimization, process & product improvements, waste and environmental impact minimization. In 2019, he was nominated as a Fellow for the US National Academy of Inventors (NAI) and among the top four (4) runners-up for GUBA's prestigious Innovation in Science & Technology Award in the USA. He was featured on Voice of America (VOA) NightLife Africa Radio on the subject matter of "*Harnessing Innovation, Invention, and Patenting for Africa's Development*" broadcasted across Africa and Asia.

His expertise includes innovation value chain management, business & IP strategy, developing and leading an effective team, prioritizing and align resources, technology & innovation management, economic feasibility analysis, water treatments and membrane science & technology. He co-authored 2 books, 2 book chapters and several articles in membrane

science and technology for separation and biomedical applications.

## Dr. Jonathan Abrokwah and Dr. Alexander Anim-Mensah

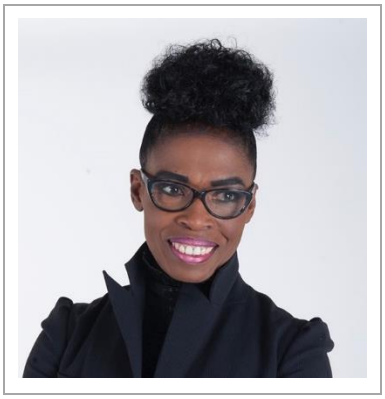

## Intellectual Property Importance for Africa's Industrialization and Competitiveness

### Abstract

In this presentation the various Intellectual Property (IP) systems across Africa, the challenges and how AfCFTA frameworks seeks to address the challenges will be shared. Also, the various IP type, benefits, duration involved, and timing will be presented. Emphasis will be placed on the types of patents, patentability and the various steps involved in applying for them, specifically a utility patent which is the commonest and most valuable. As well, information will be shared on what constitute as strong and weak patent and the costs breakdown in having a patent. Moreover, we will shed some light on the various business growth strategies i.e. organic and inorganic and how IP is necessary to position a company competitively. Finally, the process of tapping viable ideas into businesses as well as growing businesses into industries and how to stay competitive will be presented.

## Africa's Informal Sector & AFCTA Roll Out: Special Reference to Ghana

## Abstract

The informal economy, also called the informal sector or the grey economy, is the section of the economy which is neither monitored nor taxed by government. The activities or characteristics of the grey economy are never included in the nation's (gross domestic product (GDP).

The initial usage of this term is ascribed to an economy-development model, which was created by W. Arthur Lewis to describe the livelihood or employment generation primarily used in developing states. Arthur Lewis used the term to describe the kind of jobs which were viewed by many as failing outside the modern industrial sector.

It is believed to constitute two thirds of the economy of sub-Saharan Africa, although the actual figure may be higher. In south-east Asia, it is over 80%. Globally, the informal is the new normal. This is not only an issue in the developing world: over two million people work in the informal economy in the UK; over 12% of its GDP is in the informal sector, and all these numbers are steadily rising, just as it is doing in Africa.

It is for that reason that steps have to be taken by the governments of the region to re-structure and make it serve its peoples at a more beneficial level.

Apart from the AfCFTA secretariat being sited in Ghana, the government has rolled out the necessary structures capable of facilitating the take-off in January next year.

Institutional frameworks have been established and an inter-ministerial facilitation team made up of critical sector ministers who are supposed to provide strategic guidance and support to make Ghana ready for the AfCFTA. There is a national steering committee that is coordinating and guiding the support that will be given to the private companies and other stakeholders."

A national AfCFTA coordinating office has already been set up to coordinate the activities of the block in the country. In addition, seven technical working groups have also been established to examine details required to make sure that the policy is supportive and provides assistance to the benefit of private companies in the country.

Ghanaian Businesses are being empowered to harness the Benefits of the African Continental Free Trade Agreement under the Framework of the National Export Development Strategy (NED)",

Implementation of AfCFTA will lead to increasing intra-African trade and the rapid increase in the exchange of agricultural, industrial, financial, scientific and technological products, which would significantly enhance Ghana's economic fortunes, create profit for Ghanaian businesses and provide opportunities for employment for the youth.

## **Mr. Saul Molobi,** South Africa

***CEO, Brandhill Africa (Pty) Ltd***

### Biography

Saul Molobi is touted as one of the foremost thought leaders on competitive identity and public diplomacy. A former South Africa's Consul-General to Milan, he is the CEO of Brandhill Africa (Pty) Ltd. ## **Jonathan Woods,** France

***Founder, EUKALYPTON***

### Biography

Following a career in international Marketing, Communication and Change Management in senior management roles in large B2B companies (Rockwell International, Schlumberger & Alstom), I founded EUKALYPTON to support organisations to anticipate and address changes in their environments and to surf on the shifting 21st century tectonic plates.

Transformations will frequently involve digital solutions, but the process must start by understanding the changing environment, seeing the opportunities and forging a new vision. On this basis, new strategies and action plans can be defined and implemented.

I bring abroad and deep experience and acquired expertise to support leaders and entrepreneurs with their teams to position their organization around a common vision and values to define the actions and to implement them.

I have particular interest and focus on cities that face mega-challenges and in working with mayors and municipalities in Europe and in Africa.

## **Evelyne Achieno,** Uganda

***Founder and Executive Director, Evico Services***

### Biography

Evelyne is a member and champion of the prestigious African women in agribusiness network (AWAN-AFRIKA). ## How best to position the African Continent for the full exploitation of benefits of the Fourth Industrial Revolution

### Abstract

The technology remains the key driver as well as the beneficiary of the process of structural transformation for the better appropriation of the economic benefits of the African Continent. Technology is seen as critical enablers in the transformation of Africa from an agricultural-dependent continent to one based on manufacturing and services. Such a transformation will be guided with and driven by development in new technology and innovation capacity. The shift of foreign investment into the Continents towards manufacturing and service sectors is likely to increase acquisition of manufacturing technologies and skills for the African economies to be structurally transforming or at least positioning themselves to transform. The discussion will be around the full exploitation of the 4IR technologies for the economic emancipation of the African economic composition.

## Mrs. Baptista S. Gebu

***CEO, FoReal HR Services***

### Biography

Baptista is a skilled Human Resource Professional and HR Generalist with over 15+ years of relevant working experience. She is the author of "The Future of Work Capsules" available weekly in the authoritative Business and Financial Time as well as Business24Online. She is a member of the Society for Human Resource Management (SHRM - USA) and the Ghana SHRM Forum.

Building a team of efficient and effective workforce is her business and affecting lives is her divine calling. She

She is dedicated, accessible and adept at building the commitment necessary to make programs successful.

Baptista is a realist, simple, authentic, and very humane. She also manages FoReal's social enterprise ProHumane Afrique International.

## Investing into Africa's Capabilities and Institutions of work

## Abstract

How do we plan and think about the future when in actual fact, we are struggling with even the present? Africa needs to invest into its citizen's capabilities and institutions of work.

The International Labour Organization (ILO) called on governments to commit to a set of measures to address the challenges caused by unprecedented transformational change in the world of work. A Universal Labour Guarantee, social protection from birth to old age and an entitlement to lifelong learning are among several recommendations made in a landmark report by the ILO's Global Commission on the Future of Work. The future of work must address the future of businesses and their sustainability.

When businesses are protected and they survive, jobs will also be protected. For businesses and jobs to thrive in Africa, we need to invest in African's capabilities and into its institutions of work. The two work hand-in-hand. For businesses to thrive now and in the future we need to make purposive attempts at protecting jobs and businesses. The future of work cannot be business as usual as it was prior to the emergence of the covid-19 pandemic. As we may already be aware, this coronavirus pandemic is offering global economies what quick adjustments to make to the future of work. The future of work as

per research presents some new normal we need to know and observe. Let's deep drive into unlock investing into Africa's capabilities and institutions of work. The fact remains that not all jobs will be replaced by automation and robotics though a significant amount will be lost to automation. Join me as we drive advocacy together towards investing into Africa's capabilities and institutions of work.

## Erika Amoako-Agyei

***Advisory Board Member, i2iMegaHub***

## Biography

My name is Erika Amoako-Agyei and I am a Marketing professional and a business coach with the Stanford Institute for Innovation in Developing Economies for the West Africa region. At Stanford Seed, we partner with entrepreneurs in emerging markets to help build thriving enterprises that transform lives.

Over the last 20 years I've had the privilege of working in Africa with some of the most admired companies in the world. Also, I have worked with smaller companies who are some of the most ambitious companies in the world. Naturally, each of these companies were at different stages of their business life cycle. Some were feeling complacent. Others were facing problems and crisis points. But all of them wanted more success, and yet each of them struggled with the same problem: finding the right people with the skill sets to help them meet the demands of the future so they can stay competitive and move their businesses to the next level.

As jobs evolve in today's rapidly changing workplace, so will the skill needed to perform them. Today, more than ever, technology is changing the nature of work with new skills required to meet the demands of the future. Moreover, the global pandemic is forcing companies to adapt rapidly or risk dying.

Across Africa, human capital is the key. But there is a common misconception that in order to succeed in the workplace, we all need to develop highly technical or scientific skills. While these are important, these skills, alone, will no longer be enough for employees or new graduates to distinguish themselves from their peers and make a difference.

The future of work is calling for a new set of skills. In this session, we will examine how: To future-proof Africa by unlocking the potential of our human capital and our business enterprises. Thank you. I look forward to sharing more and exploring this topic together.

## Culture, Leadership & Africa's Development: Specifically, the Future of Work in Africa

## Abstract

Hello. My name is Erika Amoako-Agyei and I am a Marketing professional and a business coach with the Stanford Institute for Innovation in Developing Economies for the West Africa region. At Stanford Seed, we partner with entrepreneurs in emerging markets to help build thriving enterprises that transform lives.

Over the last 20 years I've had the privilege of working in Africa with some of the most admired companies in the world. Also, I have worked with smaller companies who are some of the most ambitious companies in the world. Naturally, each of these companies were at different stages of their business life cycle. Some were feeling complacent. Others were facing problems and crisis points. But all of them wanted more success, and yet each of them struggled with the same problem: finding the right people with the skill sets to help them meet the demands of the future so they can stay competitive and move their businesses to the next level.

As jobs evolve in today's rapidly changing workplace, so will the skill needed to perform them. Today, more than ever, technology is changing the nature of work with new skills required to meet the demands of the future. Moreover, the global pandemic is forcing companies to adapt rapidly or risk dying.

Across Africa, human capital is the key. But there is a common misconception that in order to succeed in the workplace, we all need to develop highly technical or scientific skills. While these are important, these skills, alone, will no longer be enough for employees or new graduates to distinguish themselves from their peers and make a difference.

The future of work is calling for a new set of skills. In this session, we will examine how: To future-proof Africa by unlocking the potential of our human capital and our business enterprises.

Thank you. I look forward to sharing more and exploring this topic together

## **Patience E. Chindong,** Netherlands

***Founder and CEO, EuroAfri Link***

## Biography

She is a passionate and committed Communication and Project Management Specialist trained in Cameroon and Netherlands. She obtained a Master's Degree at WUR in Applied Communication Science, with a minor in Food Technology and Food Law in International Settings. She has work to improve the livelihoods of underprivileged communities and assisting prospective African agribusinesses and students to develop skills and linkages with prospective European investors and educational institutions.

From her work experiences in the private sector and non-governmental organisations, she has developed better marketing and communication, project management, facilitation and negotiation competencies, allowing her to better foster increased productivity, people empowerment, trade and skills development that would benefit both Africans and Europeans in a sustainable manner. Realizing that adequate and timely information on opportunities is key in profitable decision-making but often lacked by African agribusinesses, her passion is to drive this area by making relevant information available to African agribusinesses and students.

She believes being a member of the Advisory Board at AAA would further give her the opportunity to broaden her scope while also offering her best to make African Agribusiness work for the whole development of African food safety and food security. Having collaboration and partnership with AIEC and the CEO of EuroAfri Link (EAL), she is confident that Africans will benefit from trade for their produce, improve access to finance for agri-development projects, and improved access to higher education for African students to further their studies in European accredited universities. Europeans would benefit from fresh agri-produce; profit from investment drives, and increased entrance of high caliber students into their universities.

## Dr. Juliet Ohemeng-Ntiamoah

***Director of R&D, i2iMegahub***

## Biography

Dr. Ohemeng-Ntiamoah is the Director of R&D for i2iMegahub, an NGO supporting African especially the youth harness their ideas to make global impacts. She has over eight (8) years of industrial experience in the water/wastewater treatment and oil & gas industries. She holds a PhD in Civil and Environmental Engineering from Tennessee Tech University-USA and BSc. Environmental Science from Kwame Nkrumah University of Science and Technology (KNUST) - Ghana.

Dr. Juliet Ohemeng-Ntiamoah has held several leadership and management positions in several organizations. She is the Founder and former President of Organization of Ghanaian Graduate Students in the USA seeking to create opportunities to connect, develop, and enrich the academic, leadership and professional capabilities of Ghanaian youth in the USA.

She is a recipient of many awards, well-published in top-tier peer-reviewed journals and presented in highly regarded national and international technical conferences.

Dr. Juliet Ohemeng-Ntiamoah is passionate about connecting African youth with mentors and resources that enhances their academic and professional development. Moreover, she devotes significant time to actively mentor and encourage young girls in STEM.

## Dr. Tetteh Abbeyquaye

## Sonwabo Mdwaba

***President and Founder, PAICTA***

### Biography

Pan African Information Communication Technology Association (PAICTA) advocates for Africa's ICT SMEs' growth and economic development by fostering their digital inclusion, collaboration and increased co-operation in the ICT digital eco-system throughout Africa.

This can only be achieved through an open and inclusive ICT digital economy that welcomes small business entrepreneurs, digital solution innovators, and application developers as part of the business eco-system.

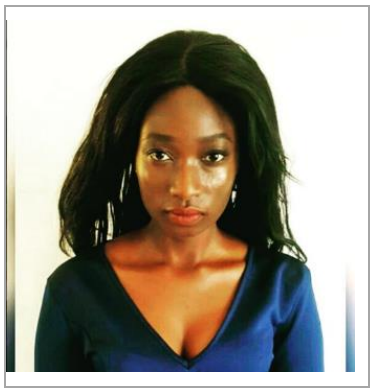

PAICTA seeks to act as a digital-transformative body in the interest of the "African Child" in the ICT sector through meaningful engagement with their respective governments, corporates, multinationals, private organisations and the African Union.

As a transformational organisation, we align with digital transformation bodies, which aim to address the imbalances, inequality, digital skills gap in the African continent and strive to ensure equity through digital economic transformation.

PAICTA in its DNA advocates for collaboration and transformation – driving African digital equity.

**Founder:**

**Sector:**

**Country:**

AERC is a public not-for-profit organization devoted to the advancement of economic policy research and training. AERC's mission is to strengthen local capacity for conducting an independent, rigorous inquiry into the problems facing the management of economies in sub-Saharan Africa. That mission rests on two basic premises:

That development is more likely to occur where there is sustained sound management of the economy.

That such management is more likely to happen where there is an active, well-informed group of locally based professional economists to conduct policy-relevant research.
